The package of the month:

InfluxData: A scalable time series database with a handy Python client

```
$ pip install influxdb
```

```
import influxdb
from config import credentials, measurement
client = influxdb.DataFrameClient(**credentials)
query = ('select * from %s'
        ' where time < now() - 90m'
        ' and time > now() - 100m'
        ' limit 10' % measurement)
df = client.query(query).get(measurement)
print(df.describe())
```

```
(ML) → poll-bme280 git:(master) python pandas-influxdb-example.py
```
